

KarKatha · GST Annual Reconciliation Dashboard

KarKatha is a browser-based workspace for reconciling a business's annual GST data — output tax, Input Tax Credit (ITC), and cash ledger — in one place. It is built as a single self-contained HTML app (no backend server required) with optional cloud sync for teams.

 **Live app:** hosted via GitHub Pages on this repository

 **Built by:** Saurabh Kumar Pandey

✨ Features

- **Import data** — drag & drop or paste CSV exports directly from the GST portal:
 - Electronic Cash Ledger
 - Electronic Credit Ledger
 - Electronic Liability Register
 - Tax Liability report
 - ITC report

- RCM Liability/ITC report
- Reverse Charge report

The app automatically identifies which report each file is, so you can drop multiple files at once.

- **Annual snapshot & overview** — a single dashboard view of the full year's GST position.
- **Monthly breakdown** — month-wise view of output tax, ITC, and cash ledger movement.
- **Cash credit table** — track cash ledger balances and credits.
- **Interest, Late Fee & Penalty tracking** — records amounts paid separately from regular tax.
- **Reconciliation**
 - Cash ledger reconciliation
 - Output tax reconciliation
- **RCM Summary** — Reverse Charge Mechanism liability and ITC in one section.
- **Annual summary** — consolidated year-end figures.
- **Dark mode** toggle.
- **Cloud sync (team workspace)** — sign in to save and share data across devices/team members (via Firebase Authentication + Firestore).

- **Quick link to GST Portal** login for convenience.
 - **PWA-ready** — includes a web app manifest and icons so it can be installed on mobile/desktop like a native app.
-

Tech Stack

- Plain **HTML, CSS, and JavaScript** — no build step required
 - [Firebase](#) (Auth + Firestore) for optional cloud sync
 - [SheetJS \(xlsx\)](#) for spreadsheet/CSV parsing
 - Deployed via **GitHub Pages** (Jekyll build workflow)
-

Getting Started

1. Open the live app (via GitHub Pages) or open `index.html` locally in a browser.
2. Sign in (if cloud sync/team login is enabled), or continue without login for local use.
3. Go to **Import data** and drag & drop your GST portal CSV exports, or use **Paste CSV content** if file upload isn't working.
4. Review your **Annual Snapshot**, **Monthly breakdown**, and **Reconciliation** sections.

5. Check the **Annual summary** for final consolidated figures.
